	21(new).	A method of operating a virtual private network, comprising the
steps	<u>of:</u>	
	(a) trigging	on a virtual private network call by a service switching point of a first
carrie	er;	
	(b) receiving	g a response from a service control point to a query from the service
switc	hing point; an	ı <u>d</u>
	(c) routing t	he virtual private network call over a private line to a switch of an
interr	<u>nediate carrie</u>	<u>भ.</u>
	22(New).	The method of claim 21, further including the steps of:
	(d) routing t	he virtual private network call from a switch of the intermediate carrier
to a s	service switch	ing point of a terminating carrier.
	23(New).	The method of claim 22, wherein step (d) further includes the step
<u>of:</u>		
	(d1)	routing the virtual private network call over a private line.
	24(New).	The method of claim 21, wherein step (a) further includes the steps
<u>of:</u>		
	<u>(a1)</u>	receiving a number at the service switching point of the first carrier.
	0-44	
	25(New).	The method of claim 21, wherein step (b) further includes the step
<u>of:</u>		
	71 AS	
	(b1)	sending a query to the service switching point.

26(New). The method of claim 21, wherein step (b) further includes the step
<u>of:</u>
(b1) receiving a plain old telephone number translation of a dialed
number.
27(New). The method of claim 21, wherein step (b) further includes the step
<u>of:</u>
(b1) receiving a billing information.
28(New). A virtual private network, comprising:
a first private virtual network in a first LATA;
a second private virtual network in a second LATA; and
an intermediate carrier routing a call between the first private virtual network an
the second private virtual network when a service control point determines the call
requires routing between the first private virtual network and the second private virtual
network.
29(New). The network of claim 28, wherein the first private virtual network is
coupled to the intermediate carrier over a private line.
30(New). The network of claim 28, wherein the second private virtual network
is coupled to the intermediate carrier over a private line.
31(New). The network of claim 28 wherein the call is initiated by dialing four
digits.
